

If you own a P250 Compact in 9mm, .40S&W or .357SIG, please take note:

The grip module design has changed so it is aligned with the rest of the P250 product family. Changes include grip texture, accessory rail and magazine well.

Important - the original and new style grip modules use different magazines.

Please note the differences shown so you are sure to select the correct magazine for your version.
