- Lifetime warranty

Optional accessory Picatinny rails available for easy mounting of optical sights, lights, and aiming devices.

Available Configuration

USC Rifle, .45 ACP black with two 10 round magazines.
Part no. 701445-A5, UPC 642230244405 - MSRP \$1499

Derived from the HK UMP submachine gun, the USC is a civilian utility carbine that uses the classic hard-hitting .45 ACP cartridge. Matched with a simple and ultra-reliable blowback operating system, the HK USC is a radical departure from traditional firearms designs.

Extensive use of the same durable reinforced polymers found on HK's line

of military and police arms ensures lightweight and durability. And the highest grade of weapons steel is used where it matters—in the cold hammer forged target barrel and the solidly constructed bolt mechanism.

User ergonomics are not sacrificed. The skeletonized buttstock is capped with a comfortable rubber cheek rest and recoil

pad. The web of the pistol grip is open for a comfortable handhold for a wide range of shooting applications. Hard points located on the top and sides of the receiver and handguard make attachment of optional Picatinny rails easy—allowing almost any kind of accessory to be mounted.

HK USC are covered by HK's lifetime warranty.
